Mist Eliminators

- W 3-stage application**
- W Aluminium or stainless steel**
- W Minimum maintenance**
- W Maximum life span**
- W Available in any size**
- W Fire damper optional**

WindeX Mist Eliminators

- Eliminate water from your air intake with the aluminium or stainless steel WindeX Mist Eliminators.
- The 3-stage WindeX Mist Eliminators eliminates not only the smallest water droplets but also protects the ventilation system against heavy rain, seawater and deck cleaning water.
- To guarantee a minimum of maintenance and a maximum life span the WindeX Mist Eliminators are made from aluminium or stainless steel.
- Deviations from the standard flange dimensions and installation depth are possible. WindeX can manufacture a Mist Eliminator – made to measure – for almost any size. Even the installation of a fire damper is possible.
- WindeX's own team of installers will place the Mist Eliminators professionally for you. But if you wish, you can easily install WindeX Mist Eliminators yourself.

Call +31 (0) 184 61 13 22 for a competitive price for your WindeX Mist Eliminators. Tailor-made for your application. In addition to its Mist Eliminators, WindeX Engineering also offers complete ventilation systems. A combination order offers even more benefits.
